

**Extracts from the Registers of Cumberworth, West Yorkshire.
As reconstructed from the Bishops' Transcripts, York,
and the Parish Registers at Wakefield.**

These entries were taken by me from the microfilm of the Bishops' Transcripts at the Borthwick institute, York, and then confirmed and amplified by checking the microfiche of the original Parish register in the Public Record Office at Wakefield up 1809. Entries not clear on the microfiche were checked against the register itself. This means that the gaps in the Transcripts and therefore the IGI have been filled up to 1808 and burials for the whole period included. I intend to check from 1809 onward at Wakefield as soon as possible. People in our family tree are underlined. Annotations by me are italics.
